

Human Factors - Real Life Applications to Safety

Human Factors in aviation safety is a broad topic that covers hundreds of textbook pages. This course will summarize the major areas that impact human performance and how those effects fit into the incident sequence. Armed with that information, the audience will learn about practical methods of minimizing errors caused by human factors inside and outside of the cockpit.

Directions: JW Marriott Desert Springs Resort is on Country Club Dr in Palm Desert, south of Interstate 10 between Cook St and Monterey Ave. It is 12 miles southeast of the Palm Springs International Airport. When you arrive on site, check in the reception area for the ALEA seminar rooms being used that day.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
